

AMENDMENTS TO THE CLAIMS

Please amend the claims as follows:

1. (Currently Amended) A system comprising:
 - a system BIOS;
 - a server including a script associated with an identification device, an identifier
and order information;
 - a computer system coupled to the server and including a port; ~~and~~
the identification a device coupled to the port, the device including the identifier;
 - the computer system configured to:
 - in response to being powered up, boot by executing instructions from the
BIOS;
 - read the identifier from the device;
 - provide the identifier to the server; ~~and~~
in response to receiving the identifier, the server causing the identifier to
be installed with the order information and the script; and
 - cause ~~a~~ the script associated with the identifier to be executed to cause
one or more software components to be installed onto the computer system; and
the identifier being removed from the computer system for reuse.
2. (Original) The system of claim 1, wherein the computer system is configured to cause
the script to be executed on the computer system.
3. (Original). The system of claim 1, wherein the computer system is configured to cause
the script to be executed on the server.
4. (Original) The system of claim 1, wherein the server includes the one or more software
components.
5. (Canceled).

6. (Currently Amended) The system of claim 51, wherein the order information includes a list of software components to be installed onto the computer system, and wherein the list includes the one or more software components.
7. (Original) The system of claim 6, wherein the script is configured to detect the one or more software components to be installed using the list.
8. (Original) The system of claim 1, wherein the port comprises a serial port.
9. (Original) The system of claim 1, wherein the port comprises a Universal Serial Bus (USB) port.
10. (Original) The system of claim 1, wherein the device comprises a programmable device.
11. (Currently Amended) A method comprising:
 - providing a computer system including a system BIOS;
 - providing a server including a script associated with an identification device, an identifier and order information;
 - coupling the identification device to the port, the device including the identifier;
 - configuring the computer system to:
 - in response to being powered up, boot by executing instructions from the BIOS;
 - read the identifier from the device;
 - provide the identifier to the server;
 - in response to receiving the identifier, the server causing the identifier to be installed with the order information and the script; and
 - cause the script associated with the identifier to be executed to cause one or more software components to be installed into the computer system; and
 - removing the identifier from the computer system for reuse.
 - ~~reading an identifier from a device coupled to a port of a computer system;~~
 - ~~providing the identifier to a server; and~~
 - ~~executing a script associated with the identifier to cause one or more software components to be installed onto the computer system; and~~

~~removing the identifier from the computer system for reuse.~~

12. (Original) The method of claim 11, further comprising:
executing the script on the computer system.
13. (Original) The method of claim 11, further comprising:
executing the script on the server.
14. (Original) The method of claim 11, further comprising:
receiving the one or more software components from the server prior to the one or more software components being installed onto the computer system.
15. (Currently Amended) The method of claim 11, ~~further comprising: wherein~~ executing the script associated with the identifier to cause the one or more software components to be installed onto the computer system, ~~the executing further comprising~~comprises:
detecting order information associated with the computer system on the server.
16. (Currently Amended) The method of claim 15, ~~further comprising: wherein~~ executing the script associated with the identifier to cause the one or more software components to be installed onto the computer system, ~~the executing further comprising~~comprises:
accessing a list of software components to be installed onto the computer system from the order information, the list including the one or more software components.
17. (Currently Amended) The method of claim 16, ~~further comprising: wherein~~ executing the script associated with the identifier to cause the one or more software components to be installed onto the computer system, ~~the executing further comprising~~comprises:
causing the one or more software components to be installed onto the computer system in response to detecting the one or more software components from the list.
18. (Original) The method of claim 11, further comprising:
reading the identifier from the device coupled to the port of a computer system, the port comprising a serial port.

19. (Original) The method of claim 11, further comprising:
reading the identifier from the device coupled to the port of a computer system,
the port comprising a Universal Serial Bus (USB) port.
20. (Original) The system of claim 11, further comprising:
reading the identifier from the device coupled to the port of a computer system,
the device comprising a programmable device.
21. (Canceled).
22. (Canceled).
23. (Canceled).
24. (Canceled).
25. (Canceled).
26. (Canceled).
27. (Canceled).
28. (Canceled).
29. (Canceled).
30. (Canceled).
